

Wow! I've got the answers, but not the questions! Can you fill them in correctly?

The very best of luck!

Complete these statements selecting from:

$\times$   $+$   $-$   $3$   $4$

1.  $\square \circ \square = 12$

2.  $\square \circ \square = 1$

3.  $\square \circ \square = 7$

Complete these statements selecting from:

$+$   $-$   $\div$   $20$   $4$

4.  $\square \circ \square = 24$

5.  $\square \circ \square = 5$

6.  $\square \circ \square = 16$

Complete these statements selecting from:

$\times$   $+$   $-$   $5$   $8$

7.  $\square \circ \square = 3$

8.  $\square \circ \square = 13$

9.  $\square \circ \square = 40$

Complete these statements selecting from:

$+$   $-$   $\div$   $27$   $3$

10.  $\square \circ \square = 9$

11.  $\square \circ \square = 24$

12.  $\square \circ \square = 30$

Put the numbers and signs into these number statements so that they are all correct.

Think carefully!

Complete these statements selecting from:

$\times$   $+$   $-$   $4$   $8$

1.  $\square \bigcirc \square = 12$

2.  $\square \bigcirc \square = 4$

3.  $\square \bigcirc \square = 32$

Complete these statements selecting from:

$+$   $-$   $\div$   $8$   $64$

4.  $\square \bigcirc \square = 8$

5.  $\square \bigcirc \square = 56$

6.  $\square \bigcirc \square = 72$

Complete these statements selecting from:

$\times$   $+$   $-$   $3$   $9$

7.  $\square \bigcirc \square = 6$

8.  $\square \bigcirc \square = 27$

9.  $\square \bigcirc \square = 12$

Complete these statements selecting from:

$\times$   $-$   $\div$   $12$   $3$

10.  $\square \bigcirc \square = 4$

11.  $\square \bigcirc \square = 9$

12.  $\square \bigcirc \square = 36$

Put the numbers and signs into these number statements so that they are all correct.

It helps if you know the 3x, 4x and 8x tables.

Complete these statements selecting from:

$\times$   $+$   $-$   $2$   $8$

1.  $\square \circ \square = 6$

2.  $\square \circ \square = 10$

3.  $\square \circ \square = 16$

Complete these statements selecting from:

$+$   $-$   $\div$   $4$   $48$

4.  $\square \circ \square = 12$

5.  $\square \circ \square = 44$

6.  $\square \circ \square = 52$

Complete these statements selecting from:

$\times$   $+$   $-$   $8$   $9$

7.  $\square \circ \square = 1$

8.  $\square \circ \square = 17$

9.  $\square \circ \square = 72$

Complete these statements selecting from:

$\times$   $-$   $\div$   $12$   $4$

10.  $\square \circ \square = 48$

11.  $\square \circ \square = 3$

12.  $\square \circ \square = 8$

It's me again! Hi, all you super brains.

Put the numbers and signs into these number statements so that they are all correct.

Complete these statements selecting from:

$\times$   $+$   $-$   $3$   $8$

1.  $\square \circ \square = 11$

2.  $\square \circ \square = 24$

3.  $\square \circ \square = 5$

Complete these statements selecting from:

$+$   $-$   $\div$   $8$   $72$

4.  $\square \circ \square = 9$

5.  $\square \circ \square = 64$

6.  $\square \circ \square = 80$

Complete these statements selecting from:

$\times$   $+$   $-$   $8$   $7$

7.  $\square \circ \square = 1$

8.  $\square \circ \square = 15$

9.  $\square \circ \square = 56$

Complete these statements selecting from:

$\times$   $-$   $\div$   $8$   $4$

10.  $\square \circ \square = 2$

11.  $\square \circ \square = 4$

12.  $\square \circ \square = 32$

Answers

Note: addition and multiplication numbers can be reversed. This is not true for subtraction and division.
