

# Varied Fluency

## Step 2: Subtract More than 4 Digits

### National Curriculum Objectives:

Mathematics Year 5: (5C2) [Add and subtract whole numbers with more than 4 digits, including using formal written methods \(columnar addition and subtraction\)](#)

### Differentiation:

**Developing** Questions to support subtracting 5-digit numbers. Includes no exchanging and no use of zero as a place holder. Using visual representation, e.g. place value chart.

**Expected** Questions to support subtracting 5-digit numbers from 5-digit numbers. Includes exchanging with some use of zero as a place holder. Using column format.

**Greater Depth** Questions to support subtracting 5-digit from 5-digit numbers. Includes exchanging with the use of zero as a place holder. Using mostly linear presentation which require converting into column format. Includes some examples of unconventional partitioning.
